

Hydrokortison Trimb

For treatment of mild eczema, insect bites and sunburn

Hydrokortison Trimb is a mild cortisone cream/ointment that can be used for various skin problems, especially various types of eczema and itching. It is therefore a good addition to your household pharmacy.

Eczema is a collective term for superficial skin inflammations that are usually long-lasting and noncontagious. Usually one or more symptoms are present such as redness, bumps, small blisters, thickening of the skin and peeling. Eczema may have many causes such as hereditary factors or substances that come into contact with the skin, like nickel and detergents, known as contact eczema. Treatment of eczema is aimed at reducing the inflammation of the skin and healing the damaged or weakened outer layer of the skin. The most important medicines are cortisone and emollients that are applied to the skin.

Suppresses inflammation and reduces swelling and redness

Hydrokortison Trimb is an over-the-counter anti-inflammatory and antipruritic medicine and is excellent for the treatment of various types of mild eczema, as well as insect bites and sunburn.

How to use Hydrokortison

Apply a thin layer each morning and evening or according to your doctor's instructions. After 3-4 days the number of applications with Hydrokortison Trimb can usually be reduced and the treatment alternated with an emollient cream. If the symptoms do not improve after one week, contact your doctor for advice. Read this leaflet carefully.

*Anti-inflammatory
and antipruritic*
